ELSEVIER

Toxicology 208 (2005) 413–419

TOXICOLOGY

www.elsevier.com/locate/toxicol

Subject index of volume 208

Adaptive resistance; Nitric oxide; NO; HO-1; Induced CNS injury; CNS disease; IAR **208**, 193

Aequorin chimeras; Cadmium; NIH 3T3 murine fibroblasts; Calcium homeostasis **208**, 389

Air pollution; Polystyrene particles; Isolated perfused lung **208**, 105

Anticholinesterase; Memantine; Carbofuran; Skeletal muscle; Oxidative stress **208**, 13

Antioxidant; Atherosclerosis; Lipid–protein adduct; LDL oxidation; Nitric oxide; Peroxynitrite; Lipoxygenase; Oxidative stress **208**, 305

Antioxidant; Butylated hydroxyanisole; One-generation reproductive toxicity; Endocrine disruption **208**, 49

Apoptosis; p53; HIF-1α; Ubiquitination; Proteasome; Hypoxia; Mdm2; pVHL **208**, 223

Apoptosis; Phosphatidylserine; Nitric oxide **208**, 259

Apoptosis; Programmed cell death; Apoptotic volume decrease (AVD); Cell shrinkage; Regulatory volume decrease (RVD); Ions **208**, 213

Apoptosis; Toxicity; Mechanism; Nitroglycerine tolerance **208**, 177

Apoptotic volume decrease (AVD); Apoptosis; Programmed cell death; Cell shrinkage; Regulatory volume decrease (RVD); Ions **208**, 213

Arachidonic acid; Ochratoxin A; TNF-α; Liver; Cytokines **208**, 335

Arsenic toxicity; Glucose metabolism; Melatonin supplementation **208**, 25

Arsenic; Selenium; Iodothyronine deiodinase; Thioredoxin reductase; Glutathione peroxidase; Fetus **208**, 357

Ascorbate; Drug hypersensitivity; Drug allergy; Drug adducts; Glutathione; Cysteine; Hemoglobin **208**, 63

Astroglia; Soman; Neural progenitors; Neural stem cells; Oligodendroglia; Microglia **208**, 319

Atherosclerosis; Antioxidant; Lipid–protein adduct; LDL oxidation; Nitric oxide; Peroxynitrite; Lipoxygenase; Oxidative stress **208**, 305

Autoimmunity; Methylmercury; Mice; Mercury speciation **208**, 149

bHLH/PAS proteins; 2,3,7,8-Tetrachlorodibenzo-*p*-dioxin; Rat; Hypothalamus; Gene expression; Species differences **208**, 1

Birth weight; Metallothionein; Placenta; Cadmium; Smoking **208**, 133

Brain sexual differentiation; Ethinylestradiol; Maternal exposure; Medial preoptic area; GAT-1; Microdissection **208**, 35

Butylated hydroxyanisole; One-generation reproductive toxicity; Endocrine disruption; Antioxidant **208**, 49

Cadmium; Metallothionein; Placenta; Birth weight; Smoking **208**, 133

Cadmium; NIH 3T3 murine fibroblasts; Aequorin chimeras; Calcium homeostasis **208**, 389

Cadmium; P-glycoprotein; Organic cation transport system; LLC-PK_1; LLC-GA5-COL 150; Secretion; Cyclosporin A; Doxorubicin **208**, 123

doi:10.1016/S0300-483X(05)00053-3

Calcium homeostasis; Cadmium; NIH 3T3 murine fibroblasts; Aequorin chimeras **208**, 389

Calcium oxalate; Oxalate crystals; Membrane damage; Renal toxicity; Proximal tubular cells **208**, 347

Carbofuran; Memantine; Anticholinesterase; Skeletal muscle; Oxidative stress **208**, 13

Cell shrinkage; Apoptosis; Programmed cell death; Apoptotic volume decrease (AVD); Regulatory volume decrease (RVD); Ions **208**, 213

Chalcones; Cytochrome P450; Lipid peroxidation; Gap junctional intercellular communication **208**, 81

CNS disease; Nitric oxide; NO; HO-1; Induced CNS injury; Adaptive resistance; IAR **208**, 193

Cresol; Platelet aggregation; Cyclooxygenase; Hemorrhage; Thromboxane; Forensic science **208**, 95

Cryptolepine; *Cryptolepis sanguinolenta*; *Hprt* mutation; Micronuclei **208**, 141

Cryptolepis sanguinolenta; Cryptolepine; *Hprt* mutation; Micronuclei **208**, 141

Cyclooxygenase; Cresol; Platelet aggregation; Hemorrhage; Thromboxane; Forensic science **208**, 95

Cyclosporin A; Cadmium; P-glycoprotein; Organic cation transport system; LLC-PK_1; LLC-GA5-COL 150; Secretion; Doxorubicin **208**, 123

Cysteine; Drug hypersensitivity; Drug allergy; Drug adducts; Ascorbate; Glutathione; Hemoglobin **208**, 63

Cytochrome P450; Chalcones; Lipid peroxidation; Gap junctional intercellular communication **208**, 81

Cytokines; Ochratoxin A; TNF-α; Arachidonic acid; Liver **208**, 335

Desferrioxamine; Paraquat; Formaldehyde; *N*-acetyl-l-cysteine; Pyrrolidine dithiocarbamate; Oxidative stress **208**, 73

Di-(2-ethylhexyl)phthalate; Mono-(2-ethylhexyl)phthalate; Metabolites mono-(2-ethyl-5-oxohexyl)phthalate; Mono-(2-ethyl-5-hydroxylhexyl)phthalate; Hershberger assay; MDA-MB453 transfected cell line **208**, 115

Diclofenac; DNA fragmentation; Free radicals; Intracellular calcium; Hepatotoxicity; Diethldithiocarbamate; Ketoconazol **208**, 367

Diethldithiocarbamate; DNA fragmentation; Free radicals; Intracellular calcium; Hepatotoxicity; Diclofenac; Ketoconazol **208**, 367

DNA fragmentation; Free radicals; Intracellular calcium; Hepatotoxicity; Diethldithiocarbamate; Diclofenac; Ketoconazol **208**, 367

DOPAC; Parkinsons disease; Mitochondria; Storage vesicles; Oxidative stress; Free radicals **208**, 207

Doxorubicin; Cadmium; P-glycoprotein; Organic cation transport system; LLC-PK_1; LLC-GA5-COL 150; Secretion; Cyclosporin A **208**, 123

Drug adducts; Drug hypersensitivity; Drug allergy; Ascorbate; Glutathione; Cysteine; Hemoglobin **208**, 63

Drug allergy; Drug hypersensitivity; Drug adducts; Ascorbate; Glutathione; Cysteine; Hemoglobin **208**, 63

Drug hypersensitivity; Drug allergy; Drug adducts; Ascorbate; Glutathione; Cysteine; Hemoglobin **208**, 63

Endocrine disruption; Butylated hydroxyanisole; One-generation reproductive toxicity; Antioxidant **208**, 49

eNOS; Nitric oxide; Hepatotoxicity; NO donor; V-PYRRO/NO; Hepatoprotection; iNOS **208**, 289

Estrogenic activity; Hydroxylated PCB; Thyroid hormonal activity; Thyroid hormone receptor; Rat pituitary tumor cell line GH3; Human breast cancer cell-line MCF-7 **208**, 377

Ethinylestradiol; Maternal exposure; Brain sexual differentiation; Medial preoptic area; GAT-1; Microdissection **208**, 35

Fetus; Arsenic; Selenium; Iodothyronine deiodinase; Thioredoxin reductase; Glutathione peroxidase **208**, 357

Forensic science; Cresol; Platelet aggregation; Cyclooxygenase; Hemorrhage; Thromboxane **208**, 95

Formaldehyde; Paraquat; *N*-acetyl-l-cysteine; Pyrrolidine dithiocarbamate; Desferrioxamine; Oxidative stress **208**, 73

Free radicals; DNA fragmentation; Intracellular calcium; Hepatotoxicity; Diethldithiocarbamate; Diclofenac; Ketoconazol **208**, 367

Free radicals; Parkinsons disease; DOPAC; Mitochondria; Storage vesicles; Oxidative stress **208**, 207

Gap junctional intercellular communication; Chalcones; Cytochrome P450; Lipid peroxidation **208**, 81

GAT-1; Ethinylestradiol; Maternal exposure; Brain sexual differentiation; Medial preoptic area; Microdissection **208**, 35

Gene expression; 2,3,7,8-Tetrachlorodibenzo-*p*-dioxin; Rat; Hypothalamus; bHLH/PAS proteins; Species differences **208**, 1

Glucose metabolism; Arsenic toxicity; Melatonin supplementation **208**, 25

Glutathione peroxidase; Arsenic; Selenium; Iodothyronine deiodinase; Thioredoxin reductase; Fetus **208**, 357

Glutathione; Drug hypersensitivity; Drug allergy; Drug adducts; Ascorbate; Cysteine; Hemoglobin **208**, 63

Hemoglobin; Drug hypersensitivity; Drug allergy; Drug adducts; Ascorbate; Glutathione; Cysteine **208**, 63

Hemorrhage; Cresol; Platelet aggregation; Cyclooxygenase; Thromboxane; Forensic science **208**, 95

Hepatoprotection; Nitric oxide; Hepatotoxicity; NO donor; V-PYRRO/NO; iNOS; eNOS **208**, 289

Hepatotoxicity; DNA fragmentation; Free radicals; Intracellular calcium; Diethldithiocarbamate; Diclofenac; Ketoconazol **208**, 367

Hepatotoxicity; Nitric oxide; NO donor; V-PYRRO/NO; Hepatoprotection; iNOS; eNOS **208**, 289

Hershberger assay; Di-(2-ethylhexyl)phthalate; Mono-(2-ethylhexyl)phthalate; Metabolites mono-(2-ethyl-5-oxohexyl)phthalate; Mono-(2-ethyl-5-hydroxylhexyl)phthalate; MDA-MB453 transfected cell line **208**, 115

HIF-1α; p53; Ubiquitination; Proteasome; Hypoxia; Mdm2; pVHL; Apoptosis **208**, 223

HO-1; Nitric oxide; NO; Induced CNS injury; CNS disease; Adaptive resistance; IAR **208**, 193

***Hprt* mutation**; Cryptolepine; *Cryptolepis sanguinolenta*; Micronuclei **208**, 141

Human breast cancer cell-line MCF-7; Hydroxylated PCB; Thyroid hormonal activity; Thyroid hormone receptor; Estrogenic activity; Rat pituitary tumor cell line GH3 **208**, 377

Hydroxylated PCB; Thyroid hormonal activity; Thyroid hormone receptor; Estrogenic activity; Rat pituitary tumor cell line GH3; Human breast cancer cell-line MCF-7 **208**, 377

Hypothalamus; 2,3,7,8-Tetrachlorodibenzo-*p*-dioxin; Rat; bHLH/PAS proteins; Gene expression; Species differences **208**, 1

Hypoxia inducible factor 1 (HIF-1); Nitric oxide (NO); Oxygenation **208**, 235

Hypoxia; p53; HIF-1α; Ubiquitination; Proteasome; Mdm2; pVHL; Apoptosis **208**, 223

IAR; Nitric oxide; NO; HO-1; Induced CNS injury; CNS disease; Adaptive resistance **208**, 193

Induced CNS injury; Nitric oxide; NO; HO-1; CNS disease; Adaptive resistance; IAR **208**, 193

Inflammatory cells; Nitric oxide; Macrophage function **208**, 249

iNOS; Nitric oxide; Hepatotoxicity; NO donor; V-PYRRO/NO; Hepatoprotection; eNOS **208**, 289

Intracellular calcium; DNA fragmentation; Free radicals; Hepatotoxicity; Diethldithiocarbamate; Diclofenac; Ketoconazol **208**, 367

Iodothyronine deiodinase; Arsenic; Selenium; Thioredoxin reductase; Glutathione peroxidase; Fetus **208**, 357

Ions; Apoptosis; Programmed cell death; Apoptotic volume decrease (AVD); Cell shrinkage; Regulatory volume decrease (RVD) **208**, 213

Isolated perfused lung; Air pollution; Polystyrene particles **208**, 105

Ketoconazol; DNA fragmentation; Free radicals; Intracellular calcium; Hepatotoxicity; Diethldithiocarbamate; Diclofenac **208**, 367

LDL oxidation; Antioxidant; Atherosclerosis; Lipid–protein adduct; Nitric oxide; Peroxynitrite; Lipoxygenase; Oxidative stress **208**, 305

Lipid peroxidation; Chalcones; Cytochrome P450; Gap junctional intercellular communication **208**, 81

Lipid–protein adduct; Antioxidant; Atherosclerosis; LDL oxidation; Nitric oxide; Peroxynitrite; Lipoxygenase; Oxidative stress **208**, 305

Lipoxygenase; Antioxidant; Atherosclerosis; Lipid–protein adduct; LDL oxidation; Nitric oxide; Peroxynitrite; Oxidative stress **208**, 305

Liver; Ochratoxin A; TNF-α; Arachidonic acid; Cytokines **208**, 335

LLC-GA5-COL 150; Cadmium; P-glycoprotein; Organic cation transport system; LLC-PK_1; Secretion; Cyclosporin A; Doxorubicin **208**, 123

LLC-PK_1; Cadmium; P-glycoprotein; Organic cation transport system; LLC-GA5-COL 150; Secretion; Cyclosporin A; Doxorubicin **208**, 123

Macrophage function; Nitric oxide; Inflammatory cells **208**, 249

Maternal exposure; Ethinylestradiol; Brain sexual differentiation; Medial preoptic area; GAT-1; Microdissection **208**, 35

MDA-MB453 transfected cell line; Di-(2-ethylhexyl)phthalate; Mono-(2-ethylhexyl)phthalate; Metabolites mono-(2-ethyl-5-oxohexyl)phthalate; Mono-(2-ethyl-5-hydroxylhexyl)phthalate; Hershberger assay **208**, 115

Mdm2; p53; HIF-1α; Ubiquitination; Proteasome; Hypoxia; pVHL; Apoptosis **208**, 223

Mechanism; Apoptosis; Toxicity; Nitroglycerine tolerance **208**, 177

Medial preoptic area; Ethinylestradiol; Maternal exposure; Brain sexual differentiation; GAT-1; Microdissection **208**, 35

Melatonin supplementation; Arsenic toxicity; Glucose metabolism **208**, 25

Memantine; Carbofuran; Anticholinesterase; Skeletal muscle; Oxidative stress **208**, 13

Membrane damage; Oxalate crystals; Calcium oxalate; Renal toxicity; Proximal tubular cells **208**, 347

Mercury speciation; Methylmercury; Mice; Autoimmunity **208**, 149

Metabolites mono-(2-ethyl-5-oxohexyl)phthalate; Di-(2-ethylhexyl)phthalate; Mono-(2-ethylhexyl)phthalate; Mono-(2-ethyl-5-hydroxylhexyl)phthalate; Hershberger assay; MDA-MB453 transfected cell line **208**, 115

Metallothionein; Placenta; Cadmium; Birth weight; Smoking **208**, 133

Methylmercury; Mice; Autoimmunity; Mercury speciation **208**, 149

Mice; Methylmercury; Autoimmunity; Mercury speciation **208**, 149

Microdissection; Ethinylestradiol; Maternal exposure; Brain sexual differentiation; Medial preoptic area; GAT-1 **208**, 35

Microglia; Soman; Neural progenitors; Neural stem cells; Astroglia; Oligodendroglia **208**, 319

Micronuclei; Cryptolepine; *Cryptolepis sanguinolenta*; *Hprt* mutation **208**, 141

Mitochondria; Parkinsons disease; DOPAC; Storage vesicles; Oxidative stress; Free radicals **208**, 207

Mono-(2-ethyl-5-hydroxylhexyl)phthalate; Di-(2-ethylhexyl)phthalate; Mono-(2-ethylhexyl)phthalate; Metabolites mono-(2-ethyl-5-oxohexyl)phthalate; Hershberger assay; MDA-MB453 transfected cell line **208**, 115

Mono-(2-ethylhexyl)phthalate; Di-(2-ethylhexyl)phthalate; Metabolites mono-(2-ethyl-5-oxohexyl)phthalate; Mono-(2-ethyl-5-hydroxylhexyl)phthalate; Hershberger assay; MDA-MB453 transfected cell line **208**, 115

***N*-acetyl-l-cysteine**; Paraquat; Formaldehyde; Pyrrolidine dithiocarbamate; Desferrioxamine; Oxidative stress **208**, 73

Neural progenitors; Soman; Neural stem cells; Astroglia; Oligodendroglia; Microglia **208**, 319

Neural stem cells; Soman; Neural progenitors; Astroglia; Oligodendroglia; Microglia **208**, 319

NIH 3T3 murine fibroblasts; Cadmium; Aequorin chimeras; Calcium homeostasis **208**, 389

Nitric oxide (NO); Oxygenation; Hypoxia inducible factor 1 (HIF-1) **208**, 235

Nitric oxide; Antioxidant; Atherosclerosis; Lipid–protein adduct; LDL oxidation; Peroxynitrite; Lipoxygenase; Oxidative stress **208**, 305

Nitric oxide; Apoptosis; Phosphatidylserine **208**, 259

Nitric oxide; Hepatotoxicity; NO donor; V-PYRRO/NO; Hepatoprotection; iNOS; eNOS **208**, 289

Nitric oxide; Inflammatory cells; Macrophage function **208**, 249

Nitric oxide; NO; HO-1; Induced CNS injury; CNS disease; Adaptive resistance; IAR **208**, 193

Nitric oxide; Pathophysiological functions; Protein **208**, 299

Nitric oxide; Peroxynitrite; Toxicity; Superoxide; Redox cycling; NOS uncouplers **208**, 273

Nitroglycerine tolerance; Apoptosis; Toxicity; Mechanism **208**, 177

NO donor; Nitric oxide; Hepatotoxicity; V-PYRRO/NO; Hepatoprotection; iNOS; eNOS **208**, 289

NO; Nitric oxide; HO-1; Induced CNS injury; CNS disease; Adaptive resistance; IAR **208**, 193

NOS uncouplers; Peroxynitrite; Toxicity; Nitric oxide; Superoxide; Redox cycling **208**, 273

Ochratoxin A; TNF-α; Arachidonic acid; Liver; Cytokines **208**, 335

Oligodendroglia; Soman; Neural progenitors; Neural stem cells; Astroglia; Microglia **208**, 319

One-generation reproductive toxicity; Butylated hydroxyanisole; Endocrine disruption; Antioxidant **208**, 49

Organic cation transport system; Cadmium; P-glycoprotein; LLC-PK_1; LLC-GA5-COL 150; Secretion; Cyclosporin A; Doxorubicin **208**, 123

Organophosphate nerve agents; Oximes (HI-6); Pharmacokinetics; Pharmacodynamics; Protective ratio **208**, 399

Oxalate crystals; Calcium oxalate; Membrane damage; Renal toxicity; Proximal tubular cells **208**, 347

Oxidative stress; Antioxidant; Atherosclerosis; Lipid–protein adduct; LDL oxidation; Nitric oxide; Peroxynitrite; Lipoxygenase **208**, 305

Oxidative stress; Memantine; Carbofuran; Anticholinesterase; Skeletal muscle **208**, 13

Oxidative stress; Paraquat; Formaldehyde; *N*-acetyl-l-cysteine; Pyrrolidine dithiocarbamate; Desferrioxamine **208**, 73

Oxidative stress; Parkinsons disease; DOPAC; Mitochondria; Storage vesicles; Free radicals **208**, 207

Oximes (HI-6); Organophosphate nerve agents; Pharmacokinetics; Pharmacodynamics; Protective ratio **208**, 399

Oxygenation; Nitric oxide (NO); Hypoxia inducible factor 1 (HIF-1) **208**, 235

P-glycoprotein; Cadmium; Organic cation transport system; LLC-PK_1; LLC-GA5-COL 150; Secretion; Cyclosporin A; Doxorubicin **208**, 123

p53; HIF-1α; Ubiquitination; Proteasome; Hypoxia; Mdm2; pVHL; Apoptosis **208**, 223

Paraquat; Formaldehyde; *N*-acetyl-l-cysteine; Pyrrolidine dithiocarbamate; Desferrioxamine; Oxidative stress **208**, 73

Parkinsons disease; DOPAC; Mitochondria; Storage vesicles; Oxidative stress; Free radicals **208**, 207

Pathophysiological functions; Nitric oxide; Protein **208**, 299

Peroxynitrite; Antioxidant; Atherosclerosis; Lipid–protein adduct; LDL oxidation; Nitric oxide; Lipoxygenase; Oxidative stress **208**, 305

Peroxynitrite; Toxicity; Nitric oxide; Superoxide; Redox cycling; NOS uncouplers **208**, 273

Pharmacodynamics; Organophosphate nerve agents; Oximes (HI-6); Pharmacokinetics; Protective ratio **208**, 399

Pharmacokinetics; Organophosphate nerve agents; Oximes (HI-6); Pharmacodynamics; Protective ratio **208**, 399

Phosphatidylserine; Apoptosis; Nitric oxide **208**, 259

Placenta; Metallothionein; Cadmium; Birth weight; Smoking **208**, 133

Platelet aggregation; Cresol; Cyclooxygenase; Hemorrhage; Thromboxane; Forensic science **208**, 95

Polystyrene particles; Air pollution; Isolated perfused lung **208**, 105

Programmed cell death; Apoptosis; Apoptotic volume decrease (AVD); Cell shrinkage; Regulatory volume decrease (RVD); Ions **208**, 213

Proteasome; p53; HIF-1α; Ubiquitination; Hypoxia; Mdm2; pVHL; Apoptosis **208**, 223

Protective ratio; Organophosphate nerve agents; Oximes (HI-6); Pharmacokinetics; Pharmacodynamics **208**, 399

Protein; Pathophysiological functions; Nitric oxide **208**, 299

Proximal tubular cells; Oxalate crystals; Calcium oxalate; Membrane damage; Renal toxicity **208**, 347

pVHL; p53; HIF-1α; Ubiquitination; Proteasome; Hypoxia; Mdm2; Apoptosis **208**, 223

Pyrrolidine dithiocarbamate; Paraquat; Formaldehyde; *N*-acetyl-l-cysteine; Desferrioxamine; Oxidative stress **208**, 73

Rat pituitary tumor cell line GH3; Hydroxylated PCB; Thyroid hormonal activity; Thyroid hormone receptor; Estrogenic activity; Human breast cancer cell-line MCF-7 **208**, 377

Rat; 2,3,7,8-Tetrachlorodibenzo-*p*-dioxin; Hypothalamus; bHLH/PAS proteins; Gene expression; Species differences **208**, 1

Redox cycling; Peroxynitrite; Toxicity; Nitric oxide; Superoxide; NOS uncouplers **208**, 273

Regulatory volume decrease (RVD); Apoptosis; Programmed cell death; Apoptotic volume decrease (AVD); Cell shrinkage; Ions **208**, 213

Renal toxicity; Oxalate crystals; Calcium oxalate; Membrane damage; Proximal tubular cells **208**, 347

Secretion; Cadmium; P-glycoprotein; Organic cation transport system; LLC-PK_1; LLC-GA5-COL 150; Cyclosporin A; Doxorubicin **208**, 123

Selenium; Arsenic; Iodothyronine deiodinase; Thioredoxin reductase; Glutathione peroxidase; Fetus **208**, 357

Skeletal muscle; Memantine; Carbofuran; Anticholinesterase; Oxidative stress **208**, 13

Smoking; Metallothionein; Placenta; Cadmium; Birth weight **208**, 133

Soman; Neural progenitors; Neural stem cells; Astroglia; Oligodendroglia; Microglia **208**, 319

Species differences; 2,3,7,8-Tetrachlorodibenzo-*p*-dioxin; Rat; Hypothalamus; bHLH/PAS proteins; Gene expression **208**, 1

Storage vesicles; Parkinsons disease; DOPAC; Mitochondria; Oxidative stress; Free radicals **208**, 207

Superoxide; Peroxynitrite; Toxicity; Nitric oxide; Redox cycling; NOS uncouplers **208**, 273

2,3,7,8-Tetrachlorodibenzo-*p*-dioxin; Rat; Hypothalamus; bHLH/PAS proteins; Gene expression; Species differences **208**, 1

Thioredoxin reductase; Arsenic; Selenium; Iodothyronine deiodinase; Glutathione peroxidase; Fetus **208**, 357

Thromboxane; Cresol; Platelet aggregation; Cyclooxygenase; Hemorrhage; Forensic science **208**, 95

Thyroid hormonal activity; Hydroxylated PCB; Thyroid hormone receptor; Estrogenic activity; Rat pituitary tumor cell line GH3; Human breast cancer cell-line MCF-7 **208**, 377

Thyroid hormone receptor; Hydroxylated PCB; Thyroid hormonal activity; Estrogenic activity; Rat pituitary tumor cell line GH3; Human breast cancer cell-line MCF-7 **208**, 377

TNF-α; Ochratoxin A; Arachidonic acid; Liver; Cytokines **208**, 335

Toxicity; Apoptosis; Mechanism; Nitroglycerine tolerance **208**, 177

Toxicity; Peroxynitrite; Nitric oxide; Superoxide; Redox cycling; NOS uncouplers **208**, 273

Ubiquitination; p53; HIF-1α; Proteasome; Hypoxia; Mdm2; pVHL; Apoptosis **208**, 223

V-PYRRO/NO; Nitric oxide; Hepatotoxicity; NO donor; Hepatoprotection; iNOS; eNOS **208**, 289
